## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Ongwela.

Ongwela discloses in figures 1-2 a device comprising a first finger covering (the cover over the index finger), a second finger covering (the cover over the ring finger), a first tool (12 on the index finger) and a second tool (12 on the ring finger).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ongwela in view of Carr, along with Lei.

Ongwela discloses in figures 1-2 a device that discloses the tools (12), can be any shape (col. 4, lines 16-21), a plurality of finger covers (each finger has a covering in fig. 1), a first stimulating means (12), a second stimulating means (12). However, Ongwela doesn't disclose forming the tools or stimulating means with different tactile sensations. Carr teaches in figures 1-8 a finger covering that includes tools (16, 34, 46)

Art Unit: 3764

that are spikes and knobs. Lei teaches in figure 4 a finger covering that includes different shaped tools (401, 402, 403) that can be on one finger covering. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the tools (stimulating means) disclosed by Ongwela could be shaped as spikes knobs, concentric rings or a plurality of curved lines based on the teaching provided by Carr and Lei. Also Ongwela teaches that the tools (stimulation means) could be any shape, which encompasses the different shapes recited in the claims of the present invention. The stimulating means could be different shapes and sizes to provide different tactile sensations to the body. The body parts that could be stimulated could include the different body parts recited in claims (13-19). A glove having first and second finger coverings is disclosed by Ongwela. Carr teaches using the finger protector as an oral motor therapy device.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Claire discloses a glove with textured finger tips.
